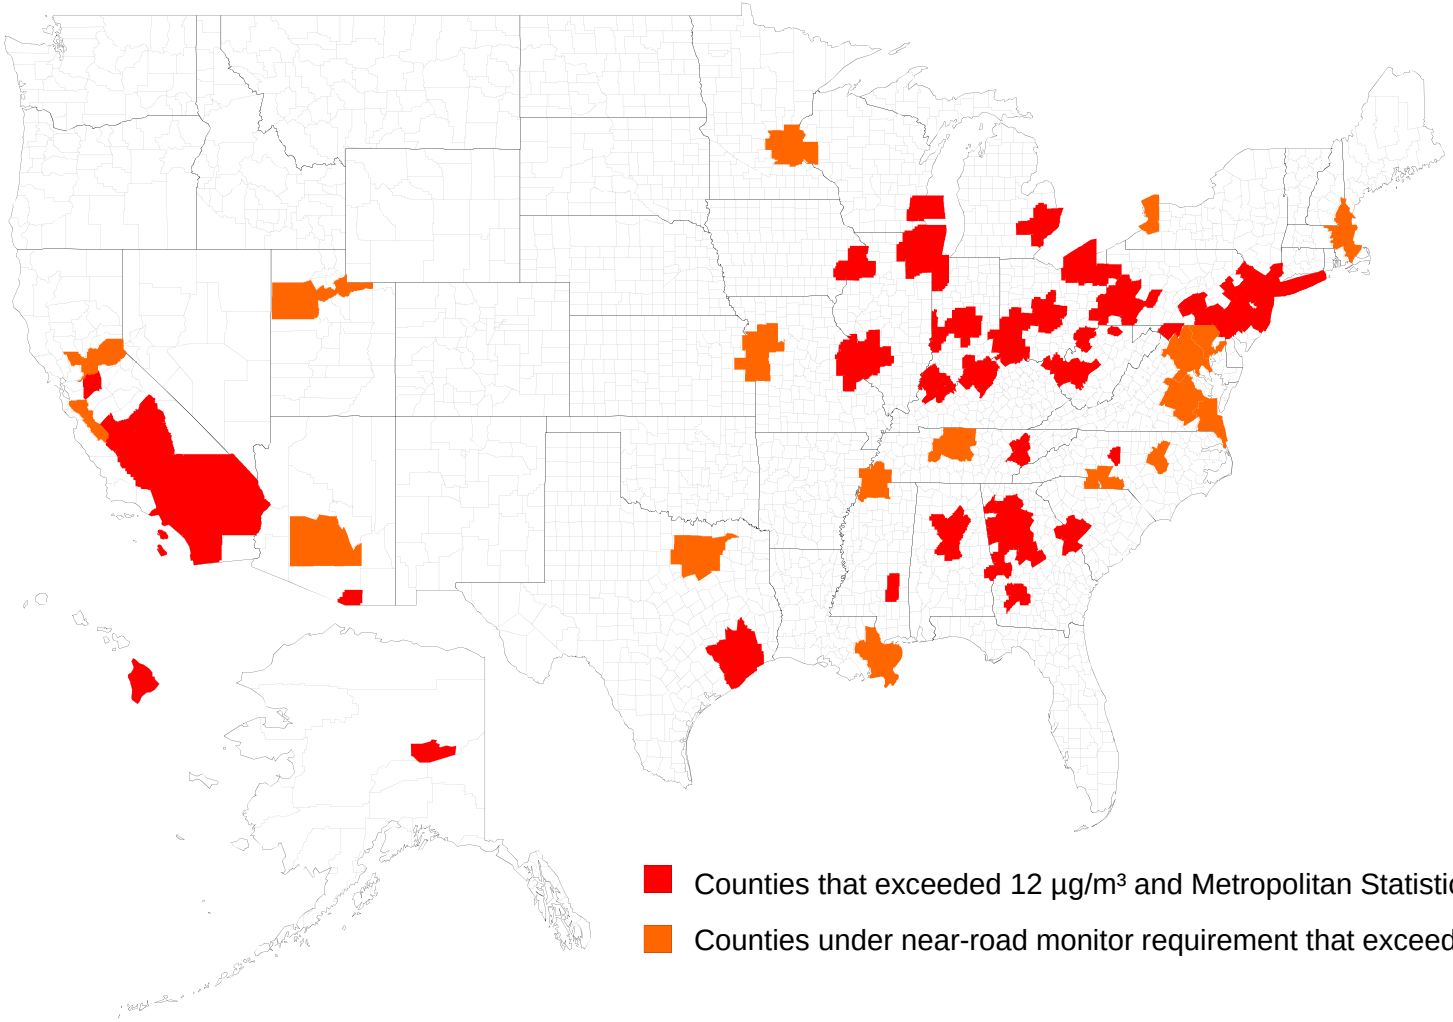
# Non-Attainment Areas at 12 µg/m³ With Near-Road Monitors



Counties that exceeded 12 µg/m³ and Metropolitan Statistical Areas (MSAs).

Counties under near-road monitor requirement that exceeded 10 µg/m³ and MSAs.*

Based on 2008-2010 data accessed from
http://www.epa.gov/airtrends/values.html

* Comments filed with EPA indicate near-road monitors read 20% higher than normal ambient monitors, thus putting 10 µg/m³ counties at risk.
