

Federal Supplier Greenhouse Gas Management Scorecard

The Federal Government procures more than \$400 billion in goods and services each year. The greenhouse gas (GHG) emissions associated with these goods and services are part of our carbon footprint.

In its second year of publication, the Federal Supplier Greenhouse Gas Management Scorecard lists our major suppliers and indicates if the supplier publicly discloses GHG emissions; has established a GHG reduction goal or target, and publicly discloses risk from climate change. The companies on the 2016 Scorecard each received at least \$500 million in Federal contracts in Fiscal Year 2015 and together accounted for over 48% of Federal spend.

By making this data public, the Scorecard encourages transparency and promotes GHG disclosure and management by our largest suppliers. Together with our industry partners, the Federal Government can more effectively manage impacts and risks in our supply chain.

To view the 2015 Federal Supplier Scorecard click [here](#).

- Discloses emissions / has a current GHG goal or target / discloses climate risk
- Commitment to disclose emissions / set a target in 2016
- No disclosure / no target
- ★ Change from 2015 Scorecard

Company	Total USG Contracts FY 2015	Discloses Emissions	Emissions Target(s)	Discloses Climate Risk
Lockheed Martin	\$ 36,259,911,071	●	●	●
Boeing	\$ 16,646,781,380	●	●	●

Notes:

Scorecard indicators reflect that a company has publicly disclosed Scope 1 and 2 emissions for 2015 or 2016; has a current GHG goal or target for 2016 or beyond; and that the company has publicly disclosed a self-assessment of physical, financial, and/or liability risks from climate change.

FY 2015 contract spending based on publicly available data from the Federal Procurement Data System - Next Generation (FPDS-NG).

1. Dollars includes awards to URS, acquired by AECOM
2. Dollars includes awards to Exelis, acquired by Harris
3. Registered in FPDS-NG as Alliant Techsystems
4. Registered in FPDS-NG as Denali Holdings
