

The Clean Energy Group's Clean Air Policy Initiative opposes S.J. Res. 37

The Clean Energy Group's Clean Air Policy Initiative does not support the use of the Congressional Review Act resolution of disapproval, S.J. Res. 37, to block implementation of EPA's final Mercury and Air Toxics Standards (MATS) for power plants. Since 2000, the electric industry has been anticipating that EPA would regulate hazardous air pollutant emissions, and the MATS rule is consistent with the requirements of the Clean Air Act. S.J. Res. 37 would prevent EPA from implementing these standards and in doing so, create significant business uncertainty, undermining the investments already made and the planning underway by many in the electric sector to date.

About the Clean Energy Group's Clean Air Policy Initiative

The Clean Energy Group's Clean Air Policy Initiative is a coalition of electric power companies dedicated to responsible energy and environmental stewardship. The members serve electricity to more than 52 million people, have nearly 150,000 megawatts of generating capacity throughout the U.S., and deliver natural gas to more than 10 million customers.
