EQUAL PAY
FOR EQUAL WORK

*The gender wage gap
puts women at a
career-long disadvantage*

In 2011, a typical 25-year-old woman working full time all year earned \$5,000 less than a typical 25-year-old man.

In just ten years, her cumulative lost wages will reach \$34,000. According to U.S. Census data, by age 65, the average woman will have lost \$431,000 over her working lifetime as a result of the earnings gap.
