First: Prosecute Google for infringement; forget about "their" "settlement."
Second: Remind Google that there was a Tasini vs. NYT et al regarding authors rights in digital use, now being disregarded by magazine publishers and Google.
Third: Remind Google of the American Geophysical Union vs. Texaco decision. You cannot use others property without permissions to increase one's own worth as a company.

Individual authors do not have the financial resources to fight these "common corporate" wealthy criminals.
