Subject: Illegal hard drive music for sale

When I browse Craigslist looking for used karaoke CDG disc's for sale. I see dozens of listings for hard drives with Illegal Karaoke music on them.

This is quite a lucrative business.

I think you at Craigslist should censor these postings closer. I find these postings with a search word of "karaoke" at various city listings.

I probably have \$7000 in my legal music which corresponds to a little over 7000 music tracts.. These are approximate figures, but very

close.

It is unfair competition to me for someone to buy a hard drive for \$200 to \$500 with 150,000 tracks of stolen music on it.

Thank for your time,

Phil Sisson in Litchfield, IL
