I have been a songwriter, recording artist and musician for over 40 years. Our creative works have been our livelihood and when our material is used without our permission or authority and musicians do not receive their due payment, it hurts our industry and our fans in the long run. It hurts the music venue that we are involved in. The copyright laws are the only protection we have against piracy of our creative works, artists rights and songwriter rights. It is very important that we retain these. I hope to hear favorable action on this matter soonk you for representing us!
