---

Dear Ms. Victoria Espinel U.S. Intellectual Property Enforcement Coordinator,  
We appreciate and wish thank you for your assistance with Act of Congress (The PROIP Act of 2008).

The lack of authority, or desire to enforce our US Copyright laws, the mass Illegal importation & counterfeiting has & is, a constant great concern.

It appears our US Copyright laws are constantly devalued, ignored & rarely enforced.

This well know fact in our music industry, permits, or condones wide scale abuses of our Copyrighted property.

When one's Creativity goes unrewarded, or unprotected. "We all suffer in Progress & Prosperity".

Without reasonable & stricter enforcement of our Copyright laws, these abusers only become more emboldened.

After all, if one's property is not secured by law and enforcement, one's property will eventually be devalued, or even lost forever.

Without enforcement, the Property owner does not receive proper & adequate compensation / protection.

This only inhibits Ambition, Creativity and Prosperity.

Land Rights, Patent Rights, Amendment Rights, all have reasonable & enforceable recourse for recovery.

The Intellectual Property issue has & is the Orphan child of law enforcement.

Without Copyright Protection, we all suffer form well deserved Income, including Our States & Federal Govt. Taxes.

Therefore, we very much appreciate your continued & committed involvement, towards the adequate & fair enforcement of our existing US Copyright Laws.

We thank you for your time & efforts, they are much appreciated by many.

Michael

Danbury, CT
