

**EXECUTIVE OFFICE OF THE PRESIDENT  
OFFICE OF MANAGEMENT AND BUDGET  
WASHINGTON, D.C. 20503**

March 19, 2015

Statement from OMB Director Shaun Donovan:

**Budgetary Impact Analysis for Executive Order Entitled  
“Planning for Sustainability in the Next Decade”**

This executive order consolidates and updates existing executive orders and presidential memoranda related to Federal sustainability, and directs executive departments and agencies to take steps to reduce greenhouse gas emissions through improved energy efficiency and proven, innovative technologies and practices. The benefits of the executive order include energy cost avoidance through reduced building energy use and fleet fuel use and improved water conservation and management. Implementing this executive order is anticipated to increase mandatory and discretionary obligations and outlays for this purpose after Fiscal Year (FY) 2015. However, this executive order is not anticipated to increase discretionary obligations and outlays overall, and the impact will depend on the annual appropriations process. Implementing this executive order is anticipated to have minimal impact on revenues to the Federal Government in the 5-fiscal year period beginning in fiscal year 2015. The agencies anticipated to be impacted by this executive order include those that are affected by the executive orders and presidential memoranda that are consolidated and updated in this executive order.
