

Include a bullet in Section 7, *Waters Generally Not Jurisdictional*, p. 21 stating:

- Artificial settling basins, cooling basins/ponds, aeration basins/ponds, polishing ponds, stormwater retention basins/ponds, and equalization tanks/ponds where they are excavated in dry land for the express purpose of creating settling basins and basins or ponds that serve similar purposes, or are excavated for manufacturing purposes, including any interconnected series of sumps, artificial trenches or ditches (also excavated or diked in uplands) that connect to the basins or ponds.
