

The National Association of Manufacturers – Key Facts:

- The NAM represents 11,000 manufacturers in all industrial sectors and in all 50 states, and is the leading voice of the manufacturing economy, which generates more than \$1.6 trillion in Gross Domestic Product (GDP).
- The NAM represents more than **2000 small and mid-sized manufacturers** who are in the business of making wood products, plastics, gypsum, and home construction products, which are sectors that use CCBs in the manufacture of their goods.
- The following is a breakdown of the potential reach of CCB regulation among small and mid-sized manufacturers:

Categories of Small and Medium Manufacturers* That May Use CCBs in Production Processes	Number of Manufacturers
1) Wood products	758
2) Plastics	740
3) Home builders	234
4) Concrete	275
5) Gypsum (a.k.a., "wallboard")	36

*The NAM defines "small and medium manufacturers" as those companies reporting annual revenues at or below \$750 million.
