NB: "Calculated levels of Production" means the amount of controlled substances produced, minus the amount destroyed by technologies to be approved by the Parties and minus the amount entirely used as feedstock in the manufacture of other chemicals (paragraph 5 of Article 1). For methyl bromide, this does not include the amounts used by the Party for quarantine and pre-shipment applications (paragraph 6 of Article 2H).

"Calculated levels of Consumption" means production plus imports minus exports of controlled substances (paragraph 6 of Article 1). However, any export of controlled substances to non-Parties are not be subtracted in calculating the consumption level of the exporting Party (paragraph (c) of Article 3).

### U.S. HCFC Baseline/Actual Consumption Comparison
