Incident No.	NTTC No	Date	Valid? (Y/N)	Product	Amt Released	Death/Injuries	Fire?	Comments
								One pint loss would indicate the tanker had already made a
								delivery when dust cap knocked off. If loaded, more product
2001030655	87	2/10/2001	No	gasoline	0.125	No	No	would have been released.
								1,105 gal release far exceeds loading line capacity. Driver
								tried to contain product but not sure what caused
2001010547	88	12/17/2000	No	gasoline	1105	No	No	compartment to release product.
								800 gal was released as emergency valve cable opened the
2001060929	89	9/18/2000	No	gasoline	800	No	No	discharge valve as result of an accident.
								Service station. Driver hit pole and line caps snapped off
2000100742	90	9/29/2000	Yes	gasoline	25	No	No	releasing product from the loading line.
2000090155	91	8/30/2000	Yes	gasoline	5	No	No	Service station. Driver struck pole at gas pump.
								Car driver struck truck and dislodged lines which spilled
								gasoline and caught on fire. Car driver killed in crash. No
								product released from tank compartmets. 5800.1 says no
								HM related deaths. (NTTC is trying to determine cause of
2000090189	92	8/2/2000	Yes	gasoline	50	Yes - 1fatality	Yes	death in this accident.)
2000051681	93	5/15/2000	Yes	gasoline	25	No	No	Loading termnal. Driver struck pole.
								Service station. Loading line cap impacted with loss of two
2000031001	94	2/24/2000	Yes	gasoline	2	No	No	gallons.

WETLINES DEFINITION: A "wetlines incident" is one in which product is released from the loading/unloading lines of a cargo tank which would not have been released if the lines were dry. The average petroleum tanker holds between 10 and 12 gallons per line in four lines under the tanker. If all four lines were damaged and product released, the total amount released would be about 50 gallons. In rare instances, the product released from the lines has caught fire and caused damage to the tanker that resulted in a larger release. Such an event would be a wetlines incident. If over 50 gallons are released in a cargo tank event, then there was a source of product other than the loading/unloading lines.

page 5 of 5 6/15/2009 11:47 AM

^{*} Amount reported exceeds 50 gallons, so incident may not be wetlines.
