This revolving fund provides for real property management and related activities, including operation, maintenance, repair of Federally owned buildings, and the construction of Federal buildings, courthouses and land ports of entry. Expenses of the Federal Buildings Fund (FBF) are financed from rental charges assessed to occupants of General Services Administration (GSA)-controlled space. Rent assessments, by law, approximate commercial rates for comparable space and services. Rental income is augmented by appropriations to the fund when new construction needs exceed the resources available for investment within the fund.

The Budget requests \$10,178 million in new obligational authority for the FBF. The Administration's proposal ensures that GSA spends at least at the level of anticipated rent that it collects from Federal Departments and Agencies in order to provide services to those customers.

Historically, the FBF has been permitted to spend at least what it collects from agencies to support leasing from the private sector, as well as maintenance, repairs, major renovations, and new construction to accommodate agency needs in buildings that GSA owns and operates. However, in several recent years, the FBF appropriations were significantly below the anticipated level of rent collections from agencies, denying GSA the ability to pursue an appropriately-sized capital program relative to the size of its portfolio. By restoring the principle that the FBF should be allowed to spend what it collects and pursuing a robust capital program, the Administration hopes to accomplish a number of policy goals: avoiding larger, longer-term capital costs associated with deferring maintenance of Federal facilities, improving energy efficiency at GSA-owned facilities, and realizing a smaller Federal footprint through improved building utilization. Those goals are also supported through the fiscal year 2017 Budget proposal to allow advance appropriations in fiscal year 2018 for spending at the anticipated level of collections in the FBF. This net zero proposal supports capital requirements as well as operating expenses. Advanced appropriations would provide greater certainty to support capital projects and ensure that the funds that agencies pay to GSA are used promptly to construct, maintain, and operate GSA facilities.

The following table reports rent and other income to the fund.

Rental of Space.—This activity provides for the leasing of privately-owned buildings. Including space occupied by Federal agencies in U.S. Postal Service facilities, GSA provided 193 million square feet of rental space in 2015. GSA expects to provide 190 million square feet of rental space in 2016 and 188 million in 2017.

Building Operations.—Building Services: This activity provides services for Government-owned and leased facilities, including cleaning, utilities and fuel, maintenance, and miscellaneous services (such as moving, evaluation of new materials and equipment, and field supervision). Salaries and Expenses: This activity provides general management and administration of all real property related programs including salaries and benefits paid from the FBF, administrative costs funded directly by the FBF, and contributions to the GSA Working Capital Fund. This appropriation covers relocation costs involved in moving agencies from valuable underutilized property, targeted for public sale, to facilities determined to be more economically suitable to their needs. Relocation and disposal is considered when the benefit/cost ratio is at least 2:1. The sale of these valuable underutilized properties would provide significant revenue to the Treasury and would far outweigh the relocation costs involved.

No appropriation is requested for this program in 2016. General Services Administration will solicit relocation proposals from agencies.

This mandatory appropriation provides for the efficient disposal of real property assets that no longer meet the needs of landholding Federal agencies. Fees of auctioneers, brokers, appraisers, and environmental consultants; surveying costs; costs of advertising; costs of environmental and historical preservation services; highest and best use of property studies; property utilization studies; deed compliance inspections; and other disposal costs are paid out of receipts from disposals in each year. GSA leverages

the expertise of auctioneers and brokers familiar with local markets to accelerate the disposal of surplus real property.

This permanent, indefinite appropriation provides for the detection and recovery of overpayments to carriers for Government moves under rate and service agreements established by GSA or by other Federal agency transportation managers. Program expenses are financed from overcharges collected from transportation service providers (TSPs) as a result of post payment audits that examine the validity, propriety, and conformity of charges with the proper rate authority. Funds recovered in excess of expenses are returned to the U.S. Treasury. In fiscal year 2015, the program returned \$1 million to the U.S. Treasury, after covering operating costs of \$11 million.

The Acquisition Services Fund (ASF) is a full cost recovery revolving fund that finances operations of the Federal Acquisition Service (FAS). The ASF provides for the acquisition of information technology solutions, telecommunications, motor vehicles, supplies and a wide range of goods and services for federal agencies. This fund recovers all costs through fees charged to federal agencies for services rendered and commodities provided.

The ASF is authorized by section 321 of title 40, United States Code, which requires the Administrator to establish rates to be charged to agencies receiving services that: (1) fully recover costs and (2) provide for the cost and capital requirements of the ASF. The ASF is authorized to retain earnings to cover the cost of replacing fleet vehicles (Replacement Cost Pricing), maintaining supply inventories adequate for customer needs, and funding anticipated operating needs specified by the Cost and Capital Plan.

The ASF is organized around four major business portfolios and three initiatives that deliver solutions to customer agencies:

Integrated Technology Services (ITS)—provides partner agencies with information technology (IT) and telecommunications products and services. ITS provides access to IT services, hardware, software, telecommunications and security services through multiple channels including the Network Services Program, IT Schedule 70, and Government-wide Acquisition Contracts (GWACs). In addition, ITS manages the Federal Public Key Infrastructure.

Assisted Acquisition Services (AAS)—assists agencies in making informed procurement decisions and serves as a center of acquisition excellence for the federal community. AAS provides acquisition, technical, and project management services related to information technology and professional services at the best value.

General Supplies and Services (GSS)—provides partner agencies with general products such as furniture, office supplies, and hardware products. GSS centralizes acquisitions on behalf of the Government to strategically procure goods and services at reduced costs, while ensuring regulatory compliance for partner agency procurements. This portfolio also provides personal property disposal services to partner agencies, which are partially funded by the Operating Expenses appropriation.

Travel, Motor Vehicle and Card Services (TMVCS)—provides partner agencies with a broad scope of services that include travel and relocation, freight management, motor vehicle acquisition, fleet management, and charge card services.

Integrated Award Environment (IAE)—provides a web-based environment that maximizes the power of federal spending data standards. IAE's mission is to work with the federal acquisition workforce and business partners to standardize, integrate, and streamline the federal awarding processes through electronic means, while increasing transparency and ensuring compliance with all applicable federal award regulations .

18F — builds effective, user-centric digital services to improve interaction between government and the people and businesses it serves. It helps agencies deliver on their mission through the development of digital and web services. 18F is financed through the ASF on a reimbursable basis with customer agencies and is managed through GSA's Office of Citizen Services and Innovative Technologies.

Common Acquisition Platform (CAP)—repurposes IT systems and develops new systems in support of GSA-wide acquisition shared services. The newly developed systems provide federal agencies with access to acquisition support data (e.g. prices paid and qualified suppliers) that allows for informed purchases.

The Information Technology Modernization Fund (ITMF) is designed to be a full cost recovery revolving fund that finances the retirement of antiquated, legacy IT systems in order to transition to new, more secure, more efficient, modern IT platforms. The fund serves as a long-term, self-sustaining mechanism for Federal agencies to regularly refresh outdated networks and systems with the newest technologies and security capabilities. As funding is allocated to priority agency projects across the Federal Government, it is subsequently replenished by agency repayments to the fund as well as fee-for-service receipts from the development and operation of shared IT platforms.

The fund is to be managed by GSA, including a project review board, comprised of experts in IT acquisition, cybersecurity, and agile development. The board reviews agency modernization proposals and selects projects for funding to ensure prioritization of projects with the greatest risk profile, government-wide impact, and probability of success. In addition, a team of systems architects and developers at GSA provide additional expertise, oversight, and development capabilities as agencies make these major transitions.

The Federal Citizen Services Fund appropriation provides for the salaries and expenses of GSA's Office of Citizen Services and Innovative Technologies (OCSIT). OCSIT develops and delivers user-centric shared services, solutions, platforms and practices to improve information and service delivery across government, enabling more efficient, effective, citizen-centered government.

The Federal Citizen Services Fund (FCSF) enables citizen access and engagement with government through an array of operational programs and direct citizen facing services. FCSF initiatives allow individuals, businesses, other governments, and the media to easily find and use federal information, services, benefits, and business opportunities via the internet, phone, email, and print. The Fund supports agency facing programs that drive government-wide transformation to digital, citizen centric government through shared services, platforms and solutions, and by providing technical expertise to agencies on projects that leverage digital technologies. Extensive communities of practice in key areas including social media, mobile computing, user experience, prize and challenge competitions, and contact centers serve as a catalyst to drive adoption and improvement of digital services through development and sharing of best practices, training, and

establishment of working groups to address tactical needs. Electronic Government (E-Gov) initiatives will continue to drive innovation in Government operations, using IT to improve the transparency, efficiency and effectiveness of Federal operations, and increase citizen participation in Government.

The FCSF is financed from annual appropriations to pay for the salaries and expenses of OCSIT staff and Citizen Services programs. Reimbursements from Federal agencies pay for the direct costs of information services OCSIT provides on behalf of the agencies. The FCSF also allows for user fees for publications ordered by the public, payments from private entities for services rendered, and gifts from the public. All income is available without regard to fiscal year limitations. OCSIT also includes the Office of 18F, a digital services development and delivery organization which houses the Presidential Innovation Fellows Program (PIF). 18F and the PIF program are funded on a reimbursable basis outside the FCSF by the Acquisition Services Fund (ASF).
