# **OBJECT CLASSIFICATION**

---

---

# Object Classification Narrative

---

This report presents the Federal Government’s obligations in terms of the object classification prescribed in section 83 of OMB Circular No. A-11. Object classes describe the “nature” of the service or article for which obligations are first incurred, regardless of the purpose, function, or program served.

**Object classes.** There are five major object classes:

- 10 Personnel Compensation and Benefits
- 20 Contractual Services and Supplies
- 30 Acquisition of Assets
- 40 Grants and Fixed Charges
- 90 Other

These major object classes are then divided into smaller classes. The tables included in this report provide the amounts shown in the object class schedules of the 2017 Budget *Appendix*. The 2015 column reflects the actual obligations recorded in the prior year, the 2016 column reflects estimated obligations incurred in the current year, and the 2017 column reflects estimated obligations for all proposed appropriations in the budget year.

Direct obligations are financed from appropriations that agencies receive from the Congress. These appropriations are funded by tax dollars. To show how the taxpayers’ money is being spent, the reports detail direct obligations by thirty-four object class codes. In contrast, reimbursable obligations are financed from offsetting collections, which are received as payment for the sale of goods and services. These collections can come from Federal or non-Federal sources. When a Federal entity purchases goods or services from another Federal entity, the purchasing entity reports direct obligations using the object class that best show the purpose of the obligation, e.g. equipment or rental payments to GSA. When obligating against the offsetting collections it receives, the performing entity reports reimbursable obligations. The performing entity may use a different object class than the purchasing entity to characterize its obligation, e.g. personnel compensation. This report shows reimbursable obligations on one total line, as these are not financed directly from appropriations.

# EXPLANATORY NOTES

---

## OFFSETTING COLLECTIONS AND OFFSETTING RECEIPTS TABLE

---

There are two types of offsets against gross obligations—“offsetting collections” and “offsetting receipts.” Both result from the same types of transactions, i.e., either business-like or market-oriented payments from the public or payments exclusively between Federal Government accounts. These collections and receipts are offset against gross obligations to derive net collections. The table that follows presents offsetting collections and offsetting receipts in a manner to allow the user to adjust gross obligations to whatever level would be most useful.

**TABLE 3: Bridge from Gross to Net Obligations.** This table presents the offsetting collections and offsetting receipts that are deducted from total obligations before arriving at net obligations by each cabinet department and major agency. Offsetting receipts that are not distributed by agency in the Budget are included in the sections titled “All Branches,” “Executive Branch,” and “Undistributed Offsetting Receipts.”

*Offsetting collections* are presented under the heading “Credited to appropriation or fund accounts” since these collections offset at the expenditure account level. Those from other Federal Government accounts are on the line called “Other Government accounts (Federal and trust).” The offsetting collections from the public that are governmental in nature (e.g., tax receipts, compulsory user charges, custom duties, license fees) but required by law to be credited to expenditure accounts are presented on the “Offsetting Governmental collections” line. Offsetting collections from the public that are payments for business-type transactions are on “The public (non-Federal sources)” line.

*Offsetting receipts* are collections that are not authorized to be credited to expenditure accounts but rather offset at the agency or subfunction level. The collections from the public that are governmental in nature but required by law to be treated as offsetting are presented on the “Offsetting Governmental receipts” line. Offsetting receipts from the public’s business-type payments are presented on the “Proprietary receipts from the public” line. Offsetting receipts from other Federal Government accounts are presented under “Intragovernmental receipts.” Payments within the same fund group—trust to trust or Federal to Federal—are presented as “Intrafund transactions,” while payments from one fund group – either Federal or trust funds—to the other fund group are presented as “Interfund transactions.”

For more information on receipts, offsetting receipts, and offsetting collections, see Chapter 9, “Budget Concepts,” in the *Analytical Perspectives* volume of the Budget.
