

the regulations of the us govt do not help the people's social welfare at all. the regs are designed to improve the lot of federal employees. the federal employees do not consult or listen to the general public at all. they develop special insider pals who they oput on the inside and that is who they work for solely and specifically. hunting gun wackos for example have taken over the fws completely. using I937 laws for 2012 life does not work. the omb report shows benefits overestimated completely. our federal govt has in the last 12 years worked against benfits for ordinary american citizens. we aer jus pawns to be disrespected. the doi bird killing by hunters was listed as an "improvement" - who says so?growing birds to kill them is sick and sadistic. this report is full of alot of full size bullsh\_\_. this report is not worth the paper it is printed on. table 303 shows agencies all have yes men who review their work. this report cost alot of tax dollars and it is crap. so many agencies keep no figures. how do they get away with this failure to keep costs and benefits accurately?
