

Zika Response: CDC Foundation Partners

3M: Contributed insect repellent to the CDC Foundation for use in Zika Prevention Kits.

Allergan: Provided oral contraceptive units to the CDC Foundation for distribution through the Foundation's contraception access effort in Puerto Rico to increase access and reduce barriers for women who want to delay or avoid pregnancy during the Zika outbreak.

Annie E. Casey Foundation: Contributed to the CDC Foundation to support a Zika health communications campaign.

Bayer: Provided intrauterine devices and oral contraceptive units to the CDC Foundation for distribution through the Foundation's contraception access effort in Puerto Rico to increase access and reduce barriers for women who want to delay or avoid pregnancy during the Zika outbreak; donated bed nets and mosquito control tablets; supported CDC's Zika Action Plan Summit.

Burkle Global Impact Initiative: Collaborated with the CDC Foundation to build partnerships to amplify CDC's Zika response efforts.

Children's Hospital Los Angeles: Utilized telemedicine platform to offer a Zika tele-education session, enabling CDC to connect with healthcare workers in Puerto Rico and Panama to discuss the emerging threat of Zika virus.

Church & Dwight Co., Inc.: Donated condoms to the CDC Foundation for use in the Zika Prevention Kits to help protect against sexual transmission of Zika.

Consumer Specialty Products Association: Partnered with the CDC Foundation to facilitate donations for Zika Prevention Kits.

CRC Industries: Provided insect control repellent to the CDC Foundation for the Zika response in American Samoa.

Bill & Melinda Gates Foundation: Supported a comprehensive health campaign to educate communities and empower women on how to prevent Zika transmission in collaboration with CDC, the CDC Foundation and the Pan American Health Organization.

Lopez Family Foundation: Utilized telemedicine platform to offer a Zika tele-education session, enabling CDC to connect with healthcare workers in Puerto Rico and Panama to discuss the emerging threat of Zika virus.

Market Vision: Provided in-kind support to the CDC Foundation to help with the Foundation's communications activities for the contraception access effort in Puerto Rico for women who want to delay or avoid pregnancy during the Zika outbreak.

Medicines 360: Donated intrauterine devices to the CDC Foundation for distribution through the Foundation's contraception access effort in Puerto Rico to increase access and reduce barriers for women who want to delay or avoid pregnancy during the Zika outbreak.

Merck & Co., Inc.: Collaborated with CDC Foundation to enable increased access to contraceptive methods in Puerto Rico and reduce barriers for women who want to delay or avoid pregnancy during the Zika outbreak.

MGK: Contributed bed nets to the CDC Foundation for Zika Prevention Kits.

The Pfizer Foundation: Donated to the CDC Foundation's U.S. Emergency Response Fund to help CDC respond to the Zika virus.

RB: Donated condoms to the CDC Foundation for use in the Zika Prevention Kits to help protect against sexual transmission of Zika.

Spectrum Brands: Donated insect repellent to the CDC Foundation for use in Zika Prevention Kits.

Summit Chemical Company: Provided mosquito control products to the CDC Foundation for use in Zika Prevention Kits.

The Female Health Company: Donated female condoms to the CDC Foundation to increase contraception access and reduce Zika transmission risks for women in Puerto Rico during the Zika outbreak.

UPS: Provided in-kind shipping to the CDC Foundation for sending Zika Prevention Kits to Puerto Rico.

Upstream USA: Provided in-kind support to the CDC Foundation for the training of medical providers and support staff for the first phase of the Foundation's contraception access effort in Puerto Rico to help increase access and reduce barriers for women who want to delay or avoid pregnancy during the Zika outbreak.

Walgreen Co.: Donated to the CDC Foundation's U.S. Emergency Response Fund, distributed CDC's Zika Prevention Kits and dedicated space in stores throughout Puerto Rico to provide information on CDC-recommended steps for Zika prevention.
